

git -- version.
git-scm.org.
Download (git client)

* Work Local Repository

1] Install git client

```

graph TD
    A[Install git client] --> B[Local]
    B --> C[no]
    B --> D[git]
    B --> E[LAN]
  
```

2] Initialize Git Repo (Folder → Repo)

```

graph LR
    A[Local Repository] --> B[git init]
    B --> C[No DVCS]
    B --> D[git DVCS]
    D --> E[Hidden]
    E --> F[ls -a]
  
```

3] Create a1.txt file.

4] (git add a1.txt) → Working → Staging.

5] git commit -m "Msg" Staging → Local Repo
